Certifications

NPTEL - Python For Data Science + Elite (Silver)

[View Certificate](#)

Technical Skills

Frontend: HTML, CSS, JavaScript, React.js

Backend: Python, FastAPI, Flask

Database: MySQL

Data Analysis: Numpy, Pandas, Matplotlib, Seaborn

Technical skills: Deep Learning, Machine Learning, Natural Language Processing

Framework/Libraries: Tensorflow, Scikit-learn, keras

Tools: Git, GitHub, Azure AI Services, Microsoft Copilot, Excel

Experience

AI Azure Intern

May 2025 – June 2025

Edunet Foundation

Remote

- Gained practical experience in AI/ML algorithms, Azure AI services, and Generative AI using Microsoft Copilot
- Developed skills in NLP, Computer Vision, and cloud-based AI integration
- Built a Stock Price Prediction model using LSTM, enhancing expertise in deep learning, time series forecasting, Python, TensorFlow, and Keras

Web Developer Intern

May 2025 – June 2025

VirtuNexa

Remote

- Developed responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and React
- Collaborated on frontend and backend integration to enhance website functionality and performance
- Gained hands-on experience in web design, API integration, and version control using Git

Projects

Stock Price Prediction using LSTM

Python, TensorFlow, Keras, Matplotlib

- Developed an end-to-end stock price prediction web application using Python, Flask, Keras, and **LSTM-based deep learning**, analyzing **20+ years of historical market data** per stock.
- Implemented data preprocessing, MinMax scaling, and **time-series windowing (100-day lookahead)** to generate accurate price predictions and trend comparisons.
- Visualized market trends using **4 exponential moving averages (20/50/100/200 days)** and prediction-vs-actual plots, improving trend interpretability by **70%**.

AI-Powered Budget Planner

Python

- Built an **AI-powered personal budget planner** using Python, NLP (**VADER**), and ML that analyzes **100+ spending entries**, classifies **needs/wants/savings**, and generates **real-time financial insights**.
- Implemented **sentiment analysis** and **savings prediction** using **NLTK** and **Linear Regression** to forecast **3-month savings trends** and identify potentially wasteful spending with **85%+ relevance**.
- Automated **financial visualization and reporting** by generating **2 analytical charts**, **priority-based budget optimization**, and **email delivery** of personalized plans, reducing manual planning effort by **60%**.

Education

Bachelor of Technology in AIML

Aug 2023 – Present

SB Jain Institute of Technology Management and Research

Nagpur

- Currently pursuing third year(6th sem) in Artificial Intelligence and Machine Learning
- CGPA: 7.06
